DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1 to 15, drawn to CYP3A inhibitors alone and in combination with a drug, classified in class 514, subclass 300+.
- II. Claim 16, drawn to a method for treating intestinal or hepatic cancer by administering A CYP3P inhibitor, classified in class 514, subclass 300+.
- III. Claims 17-18, drawn to CYP3A enhancers, classified in class 514, subclass 300+.
- IV. Claim 19, drawn to a method for treating hepatic failure by administering a CYP3A enhancer, classified in class 514, subclass 300+.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and III are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case, the different inventions group I am directed to CYP3A inhibitors and Group III is directed to CYP3A enhancers, compounds with opposite activities.

Inventions II and IV are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In

the instant, case the different inventions each group is directed to the treatment of a different type of unrelated disease.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Claims 1, 2, 5-9, 12-16, and 19 are generic to a plurality of disclosed patentably distinct species comprising the species of claims 3, 4 and 17 and the drugs of claim 10. Applicant is required under 35 U.S.C. 121 to elect a single disclosed species and a single disclosed drug if Group I is elected, even though this requirement is traversed.

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
